

Swiss Galoppers SG & SG-L

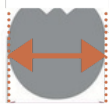

The width determines the size. Length and height determine whether it's an SG or an SG-L.

MEASURING

1. WIDTH

Measuring the widest part of the hoof.

W

2. LENGTH

Measuring from the hoof tip to end of the heel.

L

3. HEIGHT

Measure from the floor to the lowest point of the pastern.

IMPORTANT

The width indicates the size. The length in relation to the width and height affects the size. If the pad height exceeds the SG maximum, the SG-L version is required.

For the best fit: Measure your horse's clean hooves about 14 days after the last trimming. The best way to measure the ball height is while the horse is standing.

Between two sizes? If you're unsure, measure again after approximately one or two weeks. If it's still unclear, please choose the larger shoe size and/or the L version.

TEST NOW:

U.S. customers can order test boots from the [SG Shop](#) or a partner to try them out. For test boots outside the U.S., [please contact us](#).
